Professional Experience

Open Source Contributor

Mozilla

November 2022

Eugene, Oregon (Remote)

- Improved browser diagnostics for over **200 million users** by adding device pixel ratio reporting to Firefox's about:support page using **JavaScript**.
- Successfully navigated Mozilla's open-source development workflow and completed peer-reviewed code integration into the browser. [View landed contribution](#).

Software Development Intern

Oregon Criminal Defense Lawyers Association

March 2022 – June 2022

Eugene, Oregon (Remote)

- Added interactive map view to member search directory using **JavaScript**, **PHP**, and **Google Maps API**, enhancing usability for **1,000+ legal professionals**.
- Built a reusable filtering component that dynamically generates checkboxes from query parameters to improve search usability.
- Refactored 500+ lines** of legacy **PHP** and **JavaScript** code to improve maintainability, readability, and reduce technical debt across two web apps.

Projects

Bloom – Node.js, Express, EJS, MongoDB, JavaScript, Socket.IO, CSS

Bloom is a **full-stack social platform** designed to help users form new friendships based on shared interests and values. It features user authentication, customizable profiles, friend requests, notifications, and real-time messaging.

BikePed Portal (PSU Capstone) – Python, Django, Celery, PostgreSQL, JavaScript

As part of a student team, helped build a **Django**-based system to streamline upload and processing of traffic data used by urban planners across **50+ U.S. cities**.
